

# 2022 UNIVERSITY TRAVEL SURVEY

The survey was conducted 5-31 January 2022. We received 1,025 responses from 618 staff and 407 students. It was the first survey undertaken since the Covid 19 pandemic. We asked respondents to refer to a particular week when working from home guidance had been removed.

## KEY RESULTS

The pandemic has significantly altered working from home and travel patterns

70% of students travel to University location by foot

14% of staff and students travel by public transport and 8% cycle

Only 57% of staff travel commute sustainably

At least 70% of respondents who would consider alternative modes (cycling, travelling by foot or by public transport) live within a viable distance

**87%**  
sustainable travel  
target achieved in 2022

## RECOMMENDATIONS

Develop a broader range of incentives to use alternative modes and to promote them widely

Review street lighting, pedestrian crossings, entrances and exits  
Prioritise improvements

Review cycle facilities across all campuses  
Consider practicalities and costs of introducing a bike hire scheme

Explore how to reduce the costs of public transport  
Review bus waiting facilities and prioritise improvements

Further promotion and raising awareness of Co Wheels car club  
Promote Lift share platform on [www.doinguorbit.co.uk](http://www.doinguorbit.co.uk)
