

## Sustainability Communication & Engagement Plan 2022/23

This Annual Communications and Engagement Plan sits beneath the Sustainability Services' Communications Strategy. The Strategy is intentionally flexible to allow different priorities to be focused on each year, as appropriate. The Strategy identifies 5 key communications objectives:

- **Availability:** Ensure staff, students, contractors and other stakeholders are aware of the University's commitment to environmental sustainability, how it manages its environmental impacts, the successes it has achieved and that relevant, up to date information is readily available.
- **Visibility:** Ensure sustainability is highly visible across the Whiteknights, London Road and Greenlands campuses.
- **Relationships:** Develop relationships across operational and academic areas of the University to create a culture of sustainability.
- **Actions:** Ensure staff, students, contractors and other stakeholders are aware of what their responsibilities are and what positive actions they can take to reduce our collective impact on the environment.
- **Influence:** Staff, students, contractors and other stakeholders behaviours towards sustainability.

There is inevitably cross over of some of these objectives and so most of our communications activities target multiple objectives for maximum impact.

The focus for 2022/23 will be to increase staff and student engagement with the target of reducing their department's environmental footprint. To reflect this, the activities planned for this year are weighted towards achieving this objective. Activities will raise awareness and drive behaviour change in the following key areas.

### GENERAL AND STRATEGY

- Promotion of sustainability as one of the guiding principles of the University strategy.
- Promotion of the 6 key environmental workstreams launched in 2020/21 covering the following areas:
  - Net Zero Carbon
  - Water and resources use
  - Biodiversity
  - Community and civic engagement
  - Education for sustainable development

## **Sustainability Services**

- Catering and campus commerce
- Promotion of the University's new Environmental Sustainability Strategy due to launch in 2022.
- Launch of a new version of the staff sustainability engagement platform 'Doing #UoR Bit', specifically for students.
- Schools and functions behaviour change initiative and engagement programme.

### ENERGY AND CARBON

- Support departments in understanding their own carbon footprints and how to positively influence these.
- Promotion of the new staff Climate Change training module due to launch 2022/23.
- Promotion of the University's Net Zero Carbon plan and progress against this.
- Sharing of good news stories relating to energy and carbon reduction projects undertaken across campus.

### RECYCLING AND WASTE MANAGEMENT

- Focus on the importance of the principles of the waste hierarchy; reducing waste before thinking about re-use and recycling. Link to procuring goods and services in a circular economy.

### SUSTAINABLE TRAVEL

- Promotion of more sustainable modes of travel than the car.
- Sharing results of the biennial travel survey and resulting actions/activities.
- Working with public transport and cycling connections within Reading.
- Launch and promotion of the new lift share scheme where other sustainable travel methods are not viable.
- Promotion of the University's new business travel policy.

### ENVIRONMENTAL AND ENERGY MANAGEMENT SYSTEM (EEMS)

- Annual compliance responsibilities matrices will again be produced for each School/Function. This aims to ensure they are aware of their legal and EEMS compliance responsibilities, and are able to discuss and act on them.
- Suggestions for improvement to our EEMS will continue to be encouraged through emails, the website, social media, the Doing #UoR Bit platform and newsletters.
- Ongoing promotion to ensure ISO underpins everything we do in sustainability across all parts of the University.

The sustainability team has responsibility for delivery of activities outlined within the communications plan.

For each activity, metrics of successes have been defined to enable monitoring, measuring and reporting of progress. Sustainability performance is reported on to the Environmental Sustainability Committee (ESC) and University Executive Board (via ESC) through our Environmental Sustainability Report. This report includes a progress update on engagement and awareness activities/targets.
