

## Net Zero Carbon Target - Scope

University of Reading has committed to becoming Net Zero Carbon by 2030. The below graphic shows the current scope of the emissions reduction target, together with areas now measured and for which consideration of reduction targets will be included in an update plan.

The University aims to report emissions in line with the International Greenhouse Gas (GHG) Protocol standard and has completed work to also align with the principles of the new Standardised Carbon Emissions Framework (SCEF) for further and higher education.

### University of Reading carbon emission scopes

<sup>1</sup>The University does not have any upstream leased assets

<sup>2</sup>Carbon data is reported relating to pensions, however these are viewed as being beyond scope 3
