Formal Verification Statement

BSSEC confirms completion of its commissioned Full Verification of the University of Reading's 2025/26 SECR carbon data. Based on the risk-based verification procedures performed, evidence examined, and corrections made during the review, BSSEC considers the reported total of 6,755 tCO_2e sufficiently reliable for the University's SECR disclosure. This opinion is subject to the scope, source-data limitations, boundary qualifications and recommendations set out in BSSEC's full verification report.

Verified workbook (University-approved file/version): 261009 - UOR Report 2025_26 Final Revised Version.

For BSSEC Limited: Paul Bennett CEng CDir, Managing Director
